Als we leren het alledaagse op een andere manier te bekijken en, om met Sir Arthur Conan Doyle te spreken, 'de obscuriteiten' beoefenen, blijkt dat we in de wereld om ons heen veel meer kunnen waarnemen dan we aanvankelijk dachten. Het blijkt schaduwen te onthullen. Uit een lichaamshouding valt iemands karakter op te maken. En de onderkant van een boom openbaart een wereld op zichzelf. In Met andere ogen loopt Alexandra Horowitz door New York, in gezelschap van verschillende deskundigen, onder andere een stadssocioloog, een kunstenares, een geoloog, een arts, een hond en een kat. In deze wandelingen wordt duidelijk op welke manier zij de wereld om zich heen waarnemen, en wat ze zien. Horowitz beschrijft de mysteries rond de menselijke waarneming met humor en met oog voor fascinerende details. Dat leidt tot een beter begrip van de manier waarop wij de wereld en elkaar tegemoet treden en nodigt uit tot een oplettender bestaan. Er valt zo veel meer te zien als we maar de moeite nemen om écht te kijken.

William "Red Eagle" Weatherford was a Creek (Muscogee) Native American who led the Creek War offensive against the United States. Like many of the high-ranking members of the Creek nation, he was a mixture of Scottish and Creek Indian. His name was Hopnicafutsahia, or "Truth Teller," and was commonly referred to as Lamochattee, or "Red Eagle," by other Creeks. During the Creek Civil War, in February 1813, Weatherford reportedly made a strange prophecy that called for the extermination of white settlers on lands formerly held by Native Americans. He used his "vision" to gather support from various Native American groups. Offers lessons for overcoming the challenges and navigating the hidden traps associated with moving an idea to market. Includes stories and data from companies and people who have successfully managed the process. 15,000 first printing.

More than a decade ago, Clayton Christensen's breakthrough book *The Innovator's Dilemma* illustrated how disruptive innovations drive industry transformation and market creation. Christensen's research demonstrated how growth-seeking incumbents must develop the capability to deflect disruptive attacks and seize disruptive opportunities. In *The Innovator's Guide to Growth*, Scott Anthony, Mark Johnson, Joseph Sinfield, and Elizabeth Altman take the subject to the next level: implementation. The authors explain how to create this crucial capability for unlocking disruption's transformational power. With a foreword by Christensen, this book provides a set of market-proven tools and approaches to innovation that have been honed through fieldwork with innovative companies like Procter & Gamble, Johnson & Johnson, Pepsi, Intel, Motorola, SAP, and Cisco Systems. The book shows you how to: Follow a market-proven process -- so your company can reliably create blockbuster businesses Create structures, systems, and metrics -- so the disruptive innovations that will power your firm's future growth receive the funding and personnel needed to succeed Create a common language of disruptive innovation -- so managers can reach consensus around counterintuitive courses of action Incisive and practical, this book helps your company take the steps necessary to benefit from disruption -- instead of being eclipsed by it.

Nobody can predict what the future holds for the world economy, but there is growing consensus that the turmoil of 2008 will lead to a period of prolonged pain. Most managers, who have never dealt with such a global downturn, seem paralyzed.

Sultan Gadaffi has escaped from Libya with a fistful of dangerous secrets. The British Government want ex-Special Forces operative St. Range, the go-to man for any Black-Ops missions, to lead an ultra-covert mercenary group to seize him from his near-impregnable desert stronghold. Saed is defended by Tuareg warriors armed to the teeth with stolen NATO hardware. If Range's team can somehow overcome them, they will earn themselves gold bullion worth \$500 million. But as the bullets begin to fly and the body count rises, Range realises that he's been outmanoeuvred and crossed. Unwilling to lose the gold, he begins to contemplate cutting a deal with the devil.

The proliferation of entrepreneurship, technological and business innovations, emerging social trends and lifestyles, employment patterns and other developments in the global context involve creative destruction that transcends geographic and political boundaries and economic sectors and industries.
